Auth Gateway (for UC1/UC4/UC5/UC6/UC7)

Mock external identity check used before protected operations in BetaTrax.

The form contains the following elements:

- User ID** input field with the value "dev-0005".
- Password** input field with masked characters ".....".
- Authenticate** button.
- Simulate Failure** button.
- Two message boxes at the bottom showing the results of authentication attempts.

Handwritten Annotations:

- "Input User ID" with an arrow pointing to the User ID field.
- "Input password" with an arrow pointing to the Password field.
- "Authenticate button" with an arrow pointing to the Authenticate button.
- "Valid userID & password" with an arrow pointing to the successful message box.
- "Invalid userID & password" with an arrow pointing to the failed message box.

Message Boxes:

- Successful: [3/19/2026, 10:32:56 PM] Authentication successful. Log in as [developer/product manager] of [productID].
- Failed: [3/19/2026, 10:33:06 PM] Authentication failed. Invalid user ID or password.
